

Music technology in the primary classroom

Kelly-Jo Foster-Peters

Wednesday 30 June 2021

MEHEM Uprising

Aims of this session

- The value and purpose of using music technologies in primary schools.
- Pedagogical and practical considerations when using music technology to support musical learning.
- Develop confidence in making music using mobile technology.
- Use the comments as a sharing/reviewing tool to support colleagues

Technology literate

External learning

Collaborate

My experience - Using the iPad as an instrument in musical performances

**What is the purpose/value of
using technology to teach
music?**

DfE – National Curriculum (2014)

- Statutory – KS1-3

‘Use technology
appropriately’

Music

Purpose of study

Music is a universal language that embodies one of the highest forms of creativity. A high-quality music education should engage and inspire pupils to develop a love of music and their talent as musicians, and so increase their self-confidence, creativity and sense of achievement. As pupils progress, they should develop a critical engagement with music, allowing them to compose, and to listen with discrimination to the best in the musical canon.

Aims

The national curriculum for music aims to ensure that all pupils:

- perform, listen to, review and evaluate music across a range of historical periods, genres, styles and traditions, including the works of the great composers and musicians
- learn to sing and to use their voices, to create and compose music on their own and with others, have the opportunity to learn a musical instrument, use technology appropriately and have the opportunity to progress to the next level of musical excellence
- understand and explore how music is created, produced and communicated, including through the inter-related dimensions: pitch, duration, dynamics, tempo, timbre, texture, structure and appropriate musical notations.

Key stage 1

Pupils should be taught to:

- use their voices expressively and creatively by singing songs and speaking chants and rhymes
- play tuned and untuned instruments musically
- listen with concentration and understanding to a range of high-quality live and recorded music
- experiment with, create, select and combine sounds using the inter-related dimensions of music.

Reflective Questions:

- Can we use technology to enhance our vocal work?
- Can technology be used as an instrument?
- Can we access high quality music samples using technology?
- Can we use technology to explore the dimensions of music and create our own music?

Key stage 2

Pupils should be taught to sing and play musically with increasing confidence and control. They should develop an understanding of musical composition, organising and manipulating ideas within musical structures and reproducing sounds from aural memory.

Pupils should be taught to:

- play and perform in solo and ensemble contexts, using their voices and playing musical instruments with increasing accuracy, fluency, control and expression
- improvise and compose music for a range of purposes using the inter-related dimensions of music
- listen with attention to detail and recall sounds with increasing aural memory
- use and understand staff and other musical notations
- appreciate and understand a wide range of high-quality live and recorded music drawn from different traditions and from great composers and musicians
- develop an understanding of the history of music.

Reflective Questions:

- Can we use technology to play independently, and with others?
- Can we develop improvisation skills using technology?
- Can we develop aural skills and learn about notation?
- Can we interact with a range of music genre using tech?

TPACK –

Theory about different types of knowledge needed to effectively use technology in the music classroom

- Technological knowledge
- Content knowledge
- Pedagogical knowledge

Reflection: How is YOUR music technology journey going so far?

4 Stages of technology implementation

Computer or tablet?

What purpose does the technology suit?

SoundTrap

BandLab

Music Technology

PC or Macs?
iPad or Android?

Bandlab

Cakewalk (by BandLab) – free

GarageBand

Cubase LE

Logic Pro

Using Tablets to perform live music

- RAH Performance (Video not included in ppt.)

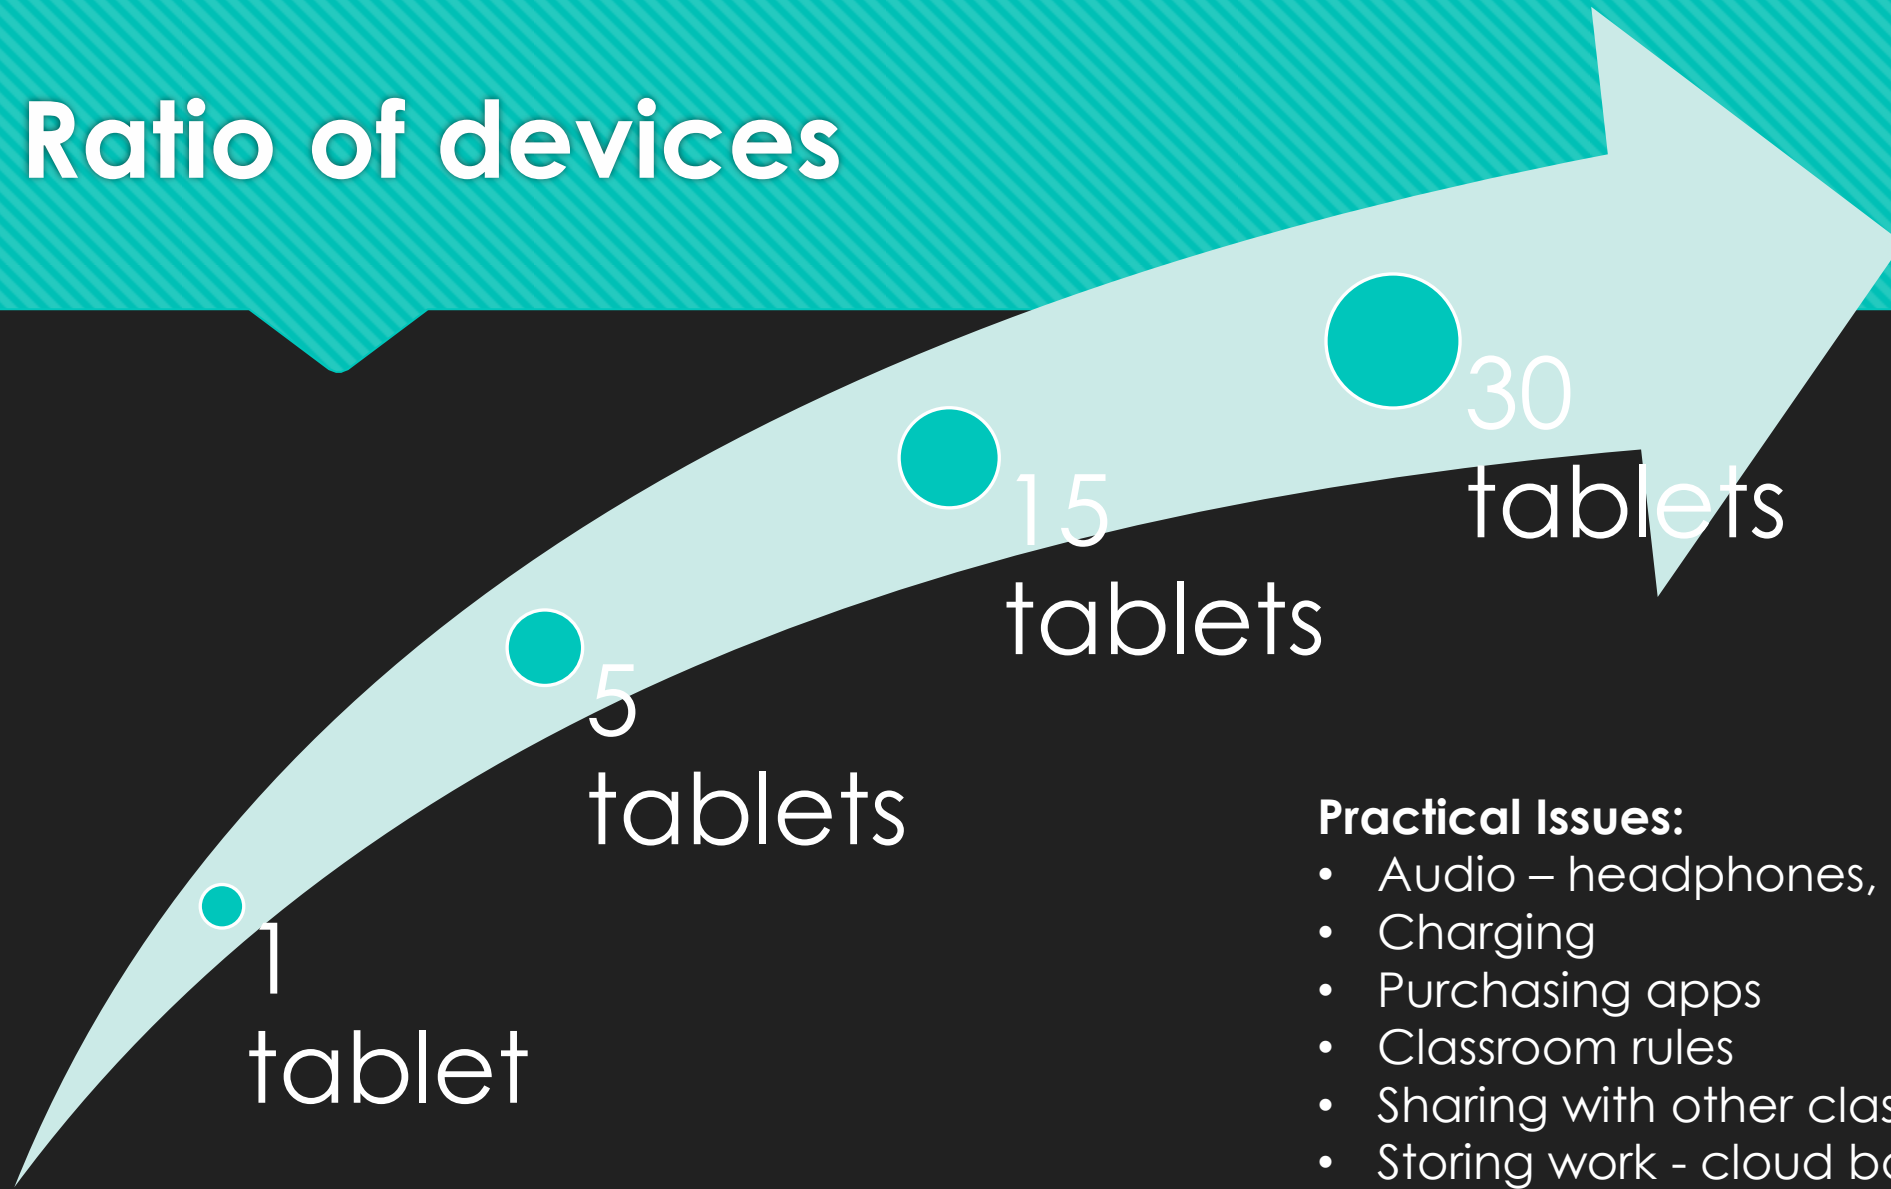

- Accessibility

- Progression in musical learning

- Developing innovative ways of playing music with others

Remember musical ability is not necessarily linked to academic ability. For example, an A* student in maths may play less musically than an F grade student.

Ratio of devices

Practical Issues:

- Audio – headphones, PA
- Charging
- Purchasing apps
- Classroom rules
- Sharing with other classes
- Storing work - cloud based solutions
- Sharing work – audience? Performances, school music blog

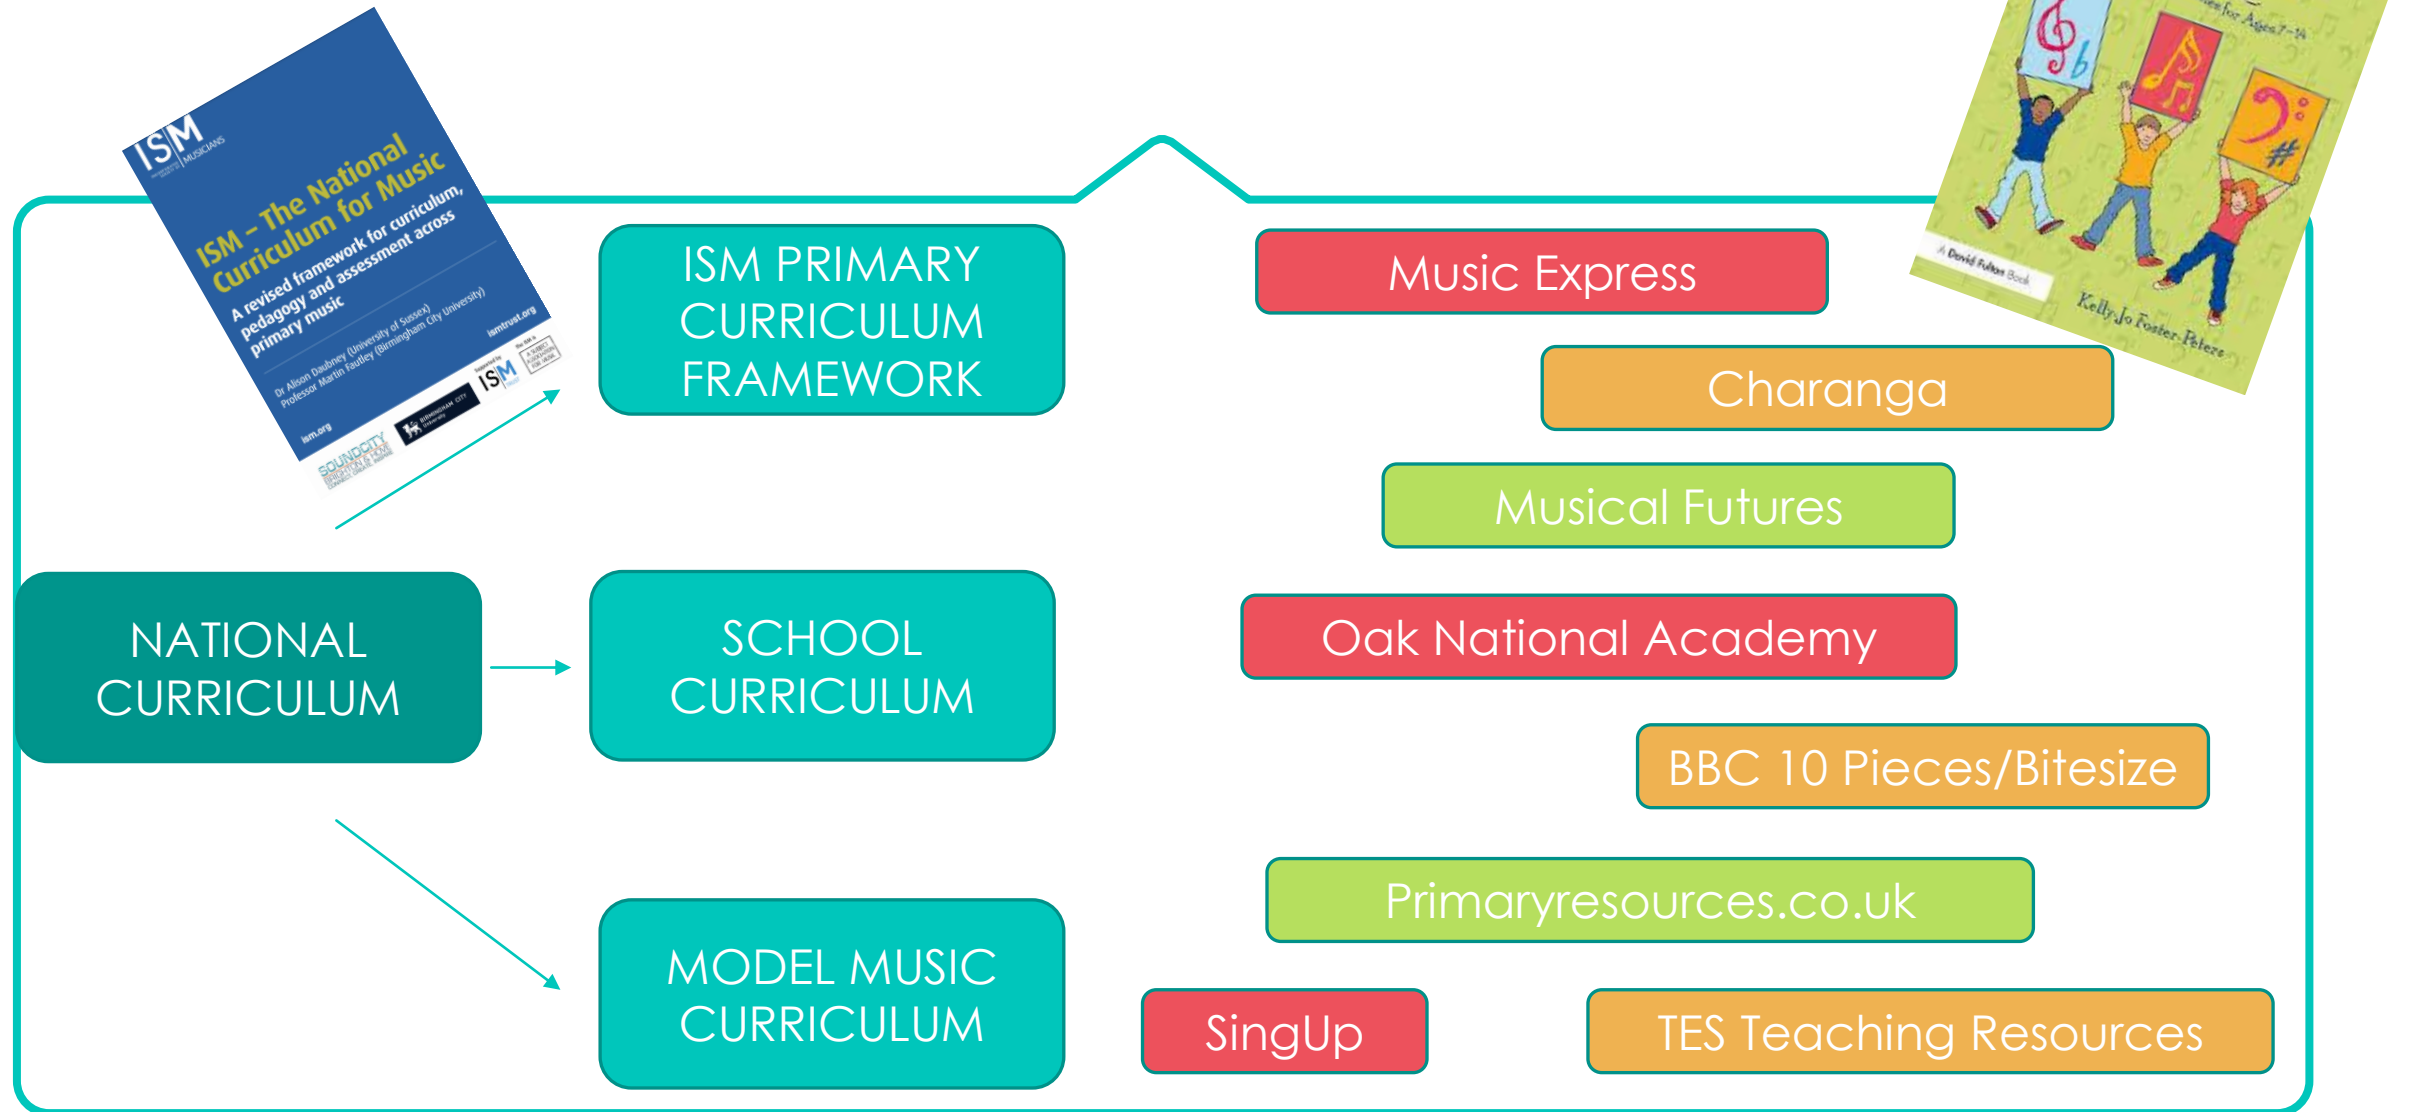

Equipment

- Tablets
- Headphones
- PA / speaker & lead/s
- Cases
- Chargers
- Trolley/bags to carry round school
- App Store cards – To purchase apps/music from the app store
- Tablet stands

CPD

- YOUTUBE – Watch videos of:
 - computer software
 - Individual apps
 - iPad band performances
- Networking – Link with other teachers who are enjoying working with technology
 - Expertise - Local secondary school music teachers
- MEH training courses, specific tailored support
- Apple Store – for devices and Apple only apps
- External courses
- Be open to learning from the children – they are often very tech savvy.

Stimulus – What to teach? How to teach it?

The screenshot shows the Yousician app interface. At the top, there's a dark navigation bar with various icons including a file icon, a list icon, a settings icon, a back arrow, a play button, a red record button, a volume slider, and a help icon. Below the navigation bar is a red textured area. On the left, a brown box contains a guitar icon and the word "Picked". On the right, a white box contains the words "Chords" and "Notes". The main part of the screen shows a guitar fretboard with four fingers placed on the strings: the second finger on the second fret, the third finger on the third fret, the fifth finger on the fifth fret, and the seventh finger on the seventh fret. The fingers are labeled with their respective numbers in a colorful, stylized font.

PEOPLE

The people in this book are called composers.

A composer is a person who makes up music and then writes it down.

An author writes a story. A composer writes a piece of music.

A composer's head is full of musical ideas. Sometimes it's hard to sort them out.

There have been thousands of composers. But only some of them are famous.

Choose a composer, or touch the green arrow to continue:

INSTRUMENTS

What is an instrument?

In music, an instrument is what you use to make sound. The main instruments in classical music are grouped into families.

Some instruments have strings to make their sound. Meet the String family...

It is quite a close family. The Strings don't argue.

Some instruments, made of wood or metal, have a hole for blowing down. Meet the Woodwind family.

They are quite different, but they all like playing solos.

Some instruments are made of brass. Meet the Brass family.

They are all loud in this family, especially the Trumpets.

Some instruments are shaken or tapped or struck (hit carefully!) to make a sound. Meet the Percussion family.

They were born in many different countries.
